WORK EXPERIENCE

Full Stack Developer Freelancer

05/2022 - Present

"Hello, I'm Sufiyan Khan, a passionate full stack developer specializing in HTML, CSS, JavaScript, and ReactJS. With a keen eye for detail and a love for clean and efficient code, I strive to create engaging and user-friendly web experiences. My journey as a developer began with a fascination for front-end development, where I honed my skills in HTML, CSS, and JavaScript to bring beautiful designs to life. As I delved deeper into the world of web development, I discovered the power of ReactJS and its ability to build scalable and interactive applications. This propelled me to become a proficient ReactJS developer, allowing me to create dynamic and responsive websites. With a strong foundation in both front-end and back-end technologies, I enjoy the challenge of seamlessly integrating different components to deliver robust and efficient solutions. I believe in continuously expanding my knowledge and staying up-to-date with the latest industry trends to provide innovative solutions to complex problems. When I'm not coding, you'll find me exploring new technologies, contributing to open-source projects, and immersing myself in the vibrant developer community. I am always excited to collaborate and work with like-minded individuals to create exceptional digital experiences."

SKILLS

Html 5

CSS 3

Javascript

ReactJS

Nextjs

MongoDB

ExpressJS

NodeJS

Material UI

React Redux

PERSONAL PROJECTS

Flipkart Clone

- In This App I use React Redux For Better State Management. You can check out this app on my portfolio And my Other Projects Also

Food Order App

Windows 11 Clone

Parking Manager

Weather App using Api

Messaging App
